Windstream VoIP 911 Disclosure

Windstream and its affiliates (collectively, ''WIN'') are subject to an FCC requirement to provide notification of any E911 limitations that may be associated with the service provided to your company. There are critical differences between traditional telephone service and WIN VoIP Services:

- 911 emergency services will not be available in the event of a power failure.
- 911 emergency services will not be available in the event of an internet failure.
- There are severe limitations (details below) to 911 emergency services if you move your phone from its registered location.

Loss of 911 services due to power failure or Internet connection failure:
Historically, telephone service has been powered by electrical power within the telephone network. If you subscribe to WIN VoIP Services, power is supplied directly from the premise in which you are operating the telephone.

- In the event of a commercial power outage, and if your building does not have a back-up power system, your telephone service, including 911, will not function until power is restored.
- Loss of power to your broadband gateway (through which your service is provided) will cause a loss of telephone and 911 services.
- Any internet connection failure, including a suspension for nonpayment, will cause a loss of telephone and 911 services.

WIN recommends that you always have an alternative means of accessing 911 during a power failure or internet connection failure such as a basic business or copper line (non-VoIP line) for elevator, alarm, and other critical functions.

To ensure that 911 calls are properly routed:

- **Do not move the equipment installed at your premise to another location.** Use of the telephone service at another location will prevent E911 service (the ability of the 911 operator to automatically determine your location) from working. If you move equipment provided as part of the WIN VoIP Service to another location, you must update your service address with WIN prior to using the service from a different location. Use of your equipment at a location other than the registered physical location may route 911 calls to an incorrect 911 dispatch center, potentially delaying or preventing emergency services.
- **If you have users that will be using devices such as software telephones that are installed on mobile personal computers, laptops, smart phones, netbooks and any other mobile VoIP supported device that is intended to be mobile with WIN service,** you must update your service address prior to using the service from a different location in order for your current location to be transmitted automatically and accurately to emergency services. Use of your software telephone at a location other than the registered physical location may route 911 calls to an incorrect 911 dispatch center, potentially delaying or preventing emergency services.
- **Always state the telephone number and address that you are calling from to the 911 operator.** The 911 operator receiving the emergency call may not be able to automatically identify your phone number and physical location and be able to call you back if the call is disconnected, therefore you must specify the exact location of the emergency and the telephone number from which you are calling.
- **Contact WIN when you plan to move your service address: WIN customers should contact the WIN Business Center at 1-800-600-5050, Windstream New Edge (formerly EarthLink Business) customers should contact Customer Care at 1-800-239-3000 and Broadview customers should contact the OfficeSuite® Support Center at 1-800-623-VOIP (8647).** Since your WIN VoIP Services will not provide 911 services from another location, you must notify WIN before you move the registered location of your service.

To help remind you about the availability of 911 emergency service and its limitations with WIN VoIP Services, we will provide stickers to be placed on or near all of your telephones and devices.

To Report a Change to Your Service Location:

- WIN Customers - Contact Customer Service at 1-855-361-7792.
- Windstream New Edge Customers - Contact Customer Care at 1-800-239-3000.
- Legacy Broadview Customers - Contact the OfficeSuite® Support Center at 1-800-623- VOIP (8647). For Broadview customers with PC/Softphone service, you may also update your address when prompted upon login.
- For Customers with Windstream Hosted Communications - Contact WHC Repair at 1- 855-759-7420. Customers using Windstream Hosted Communications on a smart phone may also access the Windstream Hosted Communications Client Software application to update.
- Legacy MassComm Customers – Contact your Account Manager directly or use 1-866- 791-6277.

Customer Affirmation of Notification
I have read the above notice and understand that there are critical differences between 911 service with WIN VoIP Services and traditional telephone service. I assume all responsibility and risk of harm, loss, or damage in the event that 911 service fails as a result of a power outage or Internet outage, in the event I fail to update my service address with WIN if I use the service from a different location or in the event I do not provide the address, correct address, extension or other information to emergency authorities.

Linn County Department ARPA Funding Request

This form is intended for use by Linn County Departments to apply for ARPA Funds for projects or programs that respond to a public need created or exacerbated by COVID-19.

Information regarding the use of funds and eligible expenditures can be accessed on the intranet under ARPA tab - Resources.

Application Deadline: Noon July 15 2022

Project/Program Name *

Epollbook/Letter Opener/Security

Describe the project/activity for which you are requesting funding, including detail on the location. *

Elections currently has received an allocation of $925,000 of ARPA funds for ballot tabulation machines. Not all machines need to be replaced. However, we have a critical procurement project due to unplanned obsolescence of ePollbook solutions. Additionally, we have identified additional areas which would gain significant efficiencies in operations and security including high-speed/high-volume letter openers, badge access readers for two critical areas, and security cameras for ballot storage. The high-speed ballot tabulators are end of service life.

In December 2022, the Elections office was notified of forthcoming obsolescence of the majority of iPads utilized for voter check-in on election day and early voting. This is a result of Apple deciding to discontinue support of this generation iPad with the release of iOS 17. Additionally, due to poor performance of this vendor (Knowink), we are also evaluating alternative options that are Microsoft Surface tablet based and carry a six year guaranteed support life. Apple does not guarantee a support life and two years of the unspecified life cycle is consumed in election security validation testing.

Elections has identified letter openers that will significantly reduce operational cost for each county-wide election. These letter openers will process up to 400 envelopes per minute including date/time stamping each piece. This will not only add efficiency on election day for opening up to 80,000 absentee ballot envelopes, but also correspondence leading up to election day. Most absentee ballot mail received is legally required to be processed within 24 hours of receipt. We anticipate a reduction of eighteen seasonal workers for a presidential election plus a reduction of election day labor associated with opening mail from 240 hours to 20-25 hours.

Elections has performed a security audit and found the access to the ballot storage areas in the Lumberyard building and PSC basement to lack auditing capabilities. Adding badge access will enable individual access control and logging of all access times. Additionally, security cameras within these spaces and the Depot ballot room are a desired measure to meet the additional scrutiny placed upon elections.

Who will be responsible for performing the work and achieving stated goals and objectives? What are their qualifications/experience? Please include all partner agencies. *

The high-speed ballot scanners will be procured from Election Systems & Software (ES&S). ES&S's epollbook solution is being evaluated to replace Knowink. Letter openers are to be stored at the Jean Oxley Public Service Center. Badge reader and security cameras will be overseen by Linn County Facilities.

Under which approved ARPA requirement does your proposal concept fall? *

- ○ Respond to the public health emergency
- ◉ Respond to negative economic impacts
- ○ Water/Sewer infrastructure

Describe the project/program timeline and milestones.

Procurement of Letter Openers to be completed by 9/15/2023.
Procurement of High-speed Ballot tabulators to be completed by 2/29/2024.
Procurement of ePollbooks to be completed by 12/31/2023.
Badge readers and security cameras to be installed by 2/29/2024.

Describe how your proposal fulfills a public need that has been created or exacerbated by the COVID-19 pandemic, specifically identify the disproportionately impacted residents being served. *

The COVID-19 pandemic has resulted in record setting reliance on the Absentee Voting process. This has required the Elections team to review processes to identify efficiencies and deficiencies to better position the division to administer the elections process within the timeline required by Iowa Code. The high-speed ballot tabulators will provide greater reliability to process the additional load whereas both existing tabulators suffered failures in the November 2022 Election. The letter openers are expected to remove a significant bottleneck in the process of opening absentee ballots. Each project listed is aimed at restoring public trust and confidence in the election process.

Describe how this program/project aligns with the strategic priorities of Linn County. *

Elections administered with trust and confidence are the cornerstone of any democracy which is at the heart of Linn County's priorities in serving the public.

Describe the project goals/objectives.

The new high-speed ballot tabulators will replace end of service tabulators to resolve reliability issues encountered in 2022's election. Implementation involves updating other components within the Elections infrastructure which has prevented us from implementing prior to January 2024.

The high-speed/high-volume letter openers will remove a substantial amount of manual labor including the hand-stamping of each piece, opening individual pieces of mail, and having an audit log of how many pieces were processed. Elections is anticipating up to 90% savings on labor associated with receiving and opening mail.

The procurement of ePollbooks is intended to meet the legal requirement of electronic solution for voter check-in when voting while also aligning with a vendor who can, and is willing to, incorporate changes to meet legal requirements within an acceptable timeframe.

Adding badge readers to the ballot rooms will give the ability to audit access, adjust individual access easily, and avoid the usage/tracking of physical keys and inevitable replacement of locks when a key is lost.

Surveillance cameras in the ballot rooms ensures any external concerns pertaining to ballot handling and accountability can be addressed.

5 YEAR CAPITAL IMPROVEMENT PROGRAM FOR FISCAL YEARS 2021 - 2025 Department Name:

Project Title	Requesting Department	For Fiscal Year
Voting and Election Equipment	Auditor (Elections)	FY2024
Project Number	**Project Location**	**Total Project Cost**
2019CP-011	Elections Depot & Lumberyard	$801,210

Executive Summary (A project request is not eligible for consideration unless all three sections below are completed. Attach additional sheets if necessary.)

1. Project Description:
Linn County Elections Office, a division within the Auditor's office, submitted a Capital Project Request with the FY2019 budget proposal. This request was to replace anticipated end-of-life ballot tabulators. Upon having this project funded, we were informed the life span of the polling place ballot tabulators is a minimum of 10 years and expected 15 years. As such, this office cannot, in good conscience, proceed with the procurement of the Polling Place ballot tabulators until FY2030 unless a technical requirement from the State requires us to do so. Currently, no such technical requirement exists.

The high-speed ballot tabulators, however, are due for replacement as they have exceeded their 6-year designed life. The cost to replace the two scanners including peripheral updates is $340,000. On-going maintenance contract expenses for these scanners will be calculated the same.

The Elections Office also learned in December 2022 that the majority of ePollbooks utilized for Election Day Voter eligibility tracking will no longer be supported after December 31, 2023. As we have had challenges with our existing ePollbook vendor, we are moving away from an iPad-based solution to gain predictability in obsolescence. The cost of the ePollbook solution is $382,250.

To improve efficiency in operations, the Elections Office is forecasting the procurement of two high-volume letter openers to substantially reduce labor cost in our mail room and ASVP board operations. Cost of two letter openers is $51,960.

In the interest of adding additional security to the Elections process, we'd also like to add badge access locks in two ballot holding areas as well as security cameras in all three ballot holding areas. Estimated cost is $27,000.
